## Diamond Builders of America's Price Planning

Our special Price Planning Approach is a system that allows us to design your project with your priorities in mind. By focusing your budget on the aspects of your project that mean the most to you, we optimize the return on your investment both in enjoyment and value. When combined with our design/build services, Diamond Builder's Price Planning Approach gives you a greater amount of control over the remodeling process, your priorities, and your budget.

With our Price Planning Approach, we help you:

- Prioritize your project into your needs, wants, and wishes
- Analyze, define, and decide how you will be using your remodeled space
- Decide what areas and items are most important to you
- Value engineer your plans towards the greatest project value based on your priorities
- Select appropriate materials and products before construction begins to establish greater cost certainty

With the Diamond Difference, our systems work together creating an ultimate client experience that is less stressful and more satisfying than if you went with another contractor.
